

## Davood Gharibi Mazankala

---

Mr. Davood Gharibi Mazankala was born in 1950 and has a degree in industrial management. He began in the used oil re-refinement industry about 47 years ago by establishing engine oil refinement factories, grease production, and blending units, and upgrading factory production lines. His designed and executed projects include the following:

Building, designing, installing, and starting engine oil grease and blending at Maral Co.

Supervising the creation, design, installation, and start of the engine oil refinery and blending in Saman Shimi Co.

Supervising the creation, installation, and design of refinery and blending in the Mahtab Engine Oil Co.

Building, installing, and starting engine oil blending at Busch. Modifying the production system for Mr. Joharchi at Ardabil to improve quality.

Building, installing, and starting grease and blending in Hirmand Shimi Co.

Building, installing, and starting engine oil blending in Taq-e Bostan, Kermanshah for Mr. Fazeli.

Modifying the oil re-refinement system in Shahrak Kaveh, Saveh.

Designing, building, and installing the latest large refineries and blending in Rafsanjan, Kerman for the Pardis Engine Oil Co., and system modification for multiple companies to enhance the production of various STSL 316 anti-vacuum pumps.
